LEHMANN®

ACTIVO RFID

BATTERY-FREE.
ENERGY AT THE PUSH OF A BUTTON.

THE RFID LOCK THAT GENERATES ENERGY AT THE PUSH OF A BUTTON
FOR MODERN FURNITURE APPLICATIONS

ACTIVO RFID
BATTERY-FREE. ENERGY AT THE PUSH OF A BUTTON.

ACTIVO RFID is a battery-free solution for secure access to furniture in offices, changing rooms, educational institutions and public areas. The required energy is generated directly when the button is pressed. No batteries are needed to operate the lock.

With its compact design and high suitability for everyday use, the ACTIVO RFID delivers real added value while eliminating battery costs. The lock can be operated with either RFID cards or the LEHMANN Transponder App. For particularly efficient management of locks, the LEHMANN Management Software (LMS) is also available, with the LEHMANN Virtual Network application, permissions can be assigned in a time-saving way via a central terminal to the transponders.

Key features at a glance

Battery-free RFID lock
The required energy is generated when the button is pressed, no battery replacement is needed.

Easy emergency opening
Hidden mechanical cylinder allows opening with a traditional service key.

Handle integration
Push-button also functions as a handle.

Flexible usage modes
Choose between assigned or shared use.

Intuitive operation
Authentication via RFID transponder[1] or the LEHMANN Transponder App for iPhones and Android smartphones[2].

Central Management:
Simple and intuitive permission management in the LEHMANN Management Software (LMS). Firmware updates via USB-C.

Virtual Network
Assign access permissions in a time-saving way via a central terminal.

[1] Transponders must be checked in advance for compatibility and range.
[2] To use the LEHMANN Transponder App via NFC technology on smartphones, please note the requirements:
- iPhone XS with iOS 17.4 or higher, and iPhones only within the European Economic Area
- For current system requirements please visit www.lehmann-locks.com.
