

# M420 | M420 PRO

COMPATIBLE. SECURE.

M420 | M420 PRO - SUCCESSOR MODELS  
TO THE PROVEN M410 SERIES

## M420 | M420 PRO COMPATIBLE. SECURE.

The M420 and M420 pro locks are the successor models to the proven M410 series. With a redesigned circuit board architecture and a well thought-out concept, they offer a future-proof solution for modern furniture locking systems.

Both models are compatible with existing control elements such as RFID readers, keypads, or fingerprint modules. While the M420 is deliberately reduced to the essentials, the M420 pro additionally features an integrated NFC module for easy configuration of keypad and fingerprint solutions via the LEHMANN Config App. Both models retain the familiar dimensions of the M410, allowing for seamless upgrades in existing furniture systems.

### Control units (examples)

### Key features at a glance

#### High system security

Coupling and communication between lock and control unit even more secure thanks to modern system architecture.

#### Broad compatibility

Compatible with all LEHMANN MIFARE and LEGIC RFID readers, the CAPIO TA03 and TA03 RFID control units, and fingerprint modules.

#### App configuration (M420 pro only)

NFC module enables quick commissioning and configuration changes via the LEHMANN Config App (e.g. for CAPIO TA03 or fingerprint).

#### Universal lock platform

One lock type (hardware & firmware) for all access control units.

#### Unchanged design

Dimensions and drill holes identical to the M410 - for seamless integration.

#### Optimised battery compartment

New sliding compartment for easier battery replacement.

#### Common battery type

CR123A battery for a reliable power supply.

RFID transponders must be checked in advance for compatibility and range.
